

Full-Stack Developer | Java, Spring, AWS, Azure | Scalable Platforms for MLB Team Clients & ML Research Teams

Work Experience

Software Engineer

Flash Stats

Jan 2025 - Present

Full SDLC, B2B & B2C

Pittsburgh, PA

[React, Python, JS, API, SQL, Jira, Teams]

- Leading full SDLC for a scalable web platform. Integrates large mySQL database through restAPI to provide advanced analytics and scouting on players across the globe. Serving public & active MLB clientele (NY Yankees, Pirates, more).
- Designed and launched the company's public-facing website (www.FlashStats.net)

Software Developer Intern

Fusion Technology LLC

2024-Present

Internal Company Projects

Remote

[React, Java, JS, Spring, restAPI, SQL, Azure]

- Built a secure, automated ticketing platform in Spring Boot that replaced a manual excel-based system, reducing request turnaround time and improving overall company accountability, visibility, and workflow efficiency.

Programming Assistant

Wehrle Global Supply Chain Lab WVU

2022-2024

Virtual Student Lessons

Morgantown, WV

[C#, Oculus, Unity 3D, Teams]

- Collaborated with faculty for R&D of student lessons in virtual reality created environments

Technologies and Languages

- Languages: Java, Python, HTML, CSS, Javascript, SQL, C#, C, Pascal, Haskell, AJAX
- Frameworks: SpringBoot, Node.js, Bootstrap, React, .NET, Unity 3D, Next.js,
- Cloud/DevOps: Azure, AWS, Git, Jira, Github, Google OAuth2, Firebase, Docker, Spark, Hadoop, Confluence
- Tools & Other: Linux, MySQL, ML, Visual Studio, Teams, Communication and Planning, Unit Testing, Logging

Projects

- PICARD -Platform for Intelligent Computer Algorithm Research & Design** 2024
[C#, .NET core, Linux, Apache Spark, Hadoop, Docker, SQL, Google OAuth2.0]
 - Built a secure platform for ML researchers (Dr. Devine, WVU) to automate tests on 1M+ entry datasets
 - used for finding images containing pulsars out of *millions* of radio telescope images (low false negative tol.)
 - Reduced turnaround time by 70–95%; decreased processor needs from ~20 to 1 via Hadoop cluster**
 - Contributed R&D, API development, cross team collaboration for complex queries, docker integration
- IT Help Desk Ticketing Platform [Java, Spring Boot, SQL, Azure DB & Deployment, JUnit, Confluence Docs]** 2025
 - Real-time status updates, role-based access control, company-only access through Microsoft authentication, exportable excel reports, complex ticket filtering, and spring security.

Interests

- Basketball, Gym, Reading, Hiking, Volunteering(Sunday School, Food bank), Guitar

Education

B.Sc. Computer Science, West Virginia University

2020-2024
