

Full-Stack Developer | Java, Spring, Dotnet, Azure | Scalable Services used by MLB teams & ML Research Teams

Work Experience

Full Stack Junior Developer - TheDYO

Jan 2026 - Present

Contract - Remote

[React, Javascript, AWS S3 and Hosting, [Node.js](https://nodejs.org/)]

- Full stack development of ecommerce platform. Building 3D design rendering software for customer products.

Software Engineer- Styled & Sorted

Aug 2025 - December 2025

Contract - Remote

[Javascript]

- Created fully automated ROI system. Reduced time spent daily from 1.5 hrs to 2 min

Software Engineer Intern - Flash Stats

Jan 2025 - Present

Rest API & B2B Software - Pittsburgh, PA

[Python, JS, API, SQL, Jira, Teams, React]

- Leading SDLC for scouting research platform using client/server architecture to serve active MLB clientele (NY Yankees, Pirates, more)
- Creator of public facing site (www.FlashStats.net)

Software Developer Intern - Fusion Technology LLC

2024-Present

DOD and FBI secure software - Remote

[Java, JS, Spring, restAPI, SQL, Azure, React]

- Built secure, automated IT ticketing webapp in **Spring Boot**. Decreased ticket handling time by 50%, giving platform for internal visibility, metrics, and communication between departments.

Programming Assistant - Wehrle Global Supply Chain Lab WVU

2022-2024

Virtual Student Lessons -Morgantown, WV

[C#, Oculus, Unity 3D, Teams]

- Collaborated with faculty for R&D of student lessons in virtual reality created environments

Technologies and Languages

- Languages: Java, Python, C# HTML, CSS, Javascript, SQL, C, Pascal, Haskell, AJAX
- Frameworks: SpringBoot, Node.js, Bootstrap, React, .NET, Unity 3D, Next.js,
- Cloud/DevOps: Azure, AWS, Git, Docker, Jira, Github, Google OAuth2, Firebase, Spark, Hadoop, Confluence

Projects

- **PICARD -Platform for Intelligent Computer Algorithm Research & Design [C#, .NET, Docker, SQL, Auth]** 2024
 - Built a secure platform for ML researchers (Dr. Devine, WVU) to automate tests on 1M+ entry datasets
 - -used for finding images containing pulsars out of *millions* of radio telescope images (low false negative tol.)
 - **Reduced turnaround time by 70–95%; decreased processor needs from ~20 to 1 via Hadoop cluster**
- **IT Help Desk Ticketing Platform [Java, Spring Boot, SQL, Azure Deployment, Maven, Documentation]** 2025
 - Role-based access control, company-only access security, exportable reports, JPA filtering, Junit Testing

Interests

- Basketball(Coaching), Gym, Reading, Hiking, Volunteering(Sunday School, Food bank), Guitar

Education

B.Sc. Computer Science, West Virginia University

2020-2024
