

Full-Stack Developer | React, Java, AWS | Built Scalable Platforms for MLB Team Clients & ML Research Teams

Work Experience

Software Engineer

Flash Stats

Jan 2025 - Present

Full SDLC, B2B & B2C

Pittsburgh, PA

[React, Python, JS, API, SQL, Jira, Teams]

- Led full SDLC for web platform serving advanced analytics and projections used by MLB clientele.
- Developed structured JSON pipelines to integrate data engineering's visualizations into the user flow, eliminated prior delivery time completely & scales processed analytics concurrency by 1000% for end-user access.

Software Developer Intern

Fusion Technology LLC

2024-Present

Internal Company Projects

Remote

[React, Java, JS, Spring, API, SQL, Azure]

- Developed a fully automated IT ticketing platform on a 3-person Agile team, end-to-end features include ticket creation, routing, admin dashboard with reports, db integration, audit logging, with comprehensive documentation.

Programming Assistant

Wehrle Global Supply Chain Lab WVU

2022-2024

Virtual Student Lessons

Morgantown, WV

[C#, Oculus, Unity 3D, Teams]

- Collaborated with faculty for R&D of student lessons in virtual reality created environments

Technologies and Languages

- Languages: Java, Python, HTML, CSS, Javascript, SQL, C#, C, Pascal, Haskell, AJAX
- Frameworks: SpringBoot, Node.js, Bootstrap, React, .NET, Unity 3D, Next.js,
- Cloud/DevOps: Azure, AWS, Git, Jira, Github, Google OAuth2, Firebase, Docker, Spark, Hadoop, Confluence
- Tools & Other: Linux, MySQL, ML, Visual Studio, Teams, Communication and Planning, Unit Testing, Logging

Projects

- **PICARD -Platform for Intelligent Computer Algorithm Research & Design** 2023-2024
[C#, .NET core, Linux, Apache Spark, Hadoop, Docker, SQL, Google OAuth2.0]
 - Built a secure platform for ML researchers (Dr. Devine, WVU) to automate tests on 1M+ entry datasets
 - -used for finding images containing pulsars out of *millions* of radio telescope images (low false negative tol.)
 - **Reduced turnaround time by 70–95%; decreased processor needs from ~20 to 1 via Hadoop cluster**
 - Contributed R&D, API development, cross team collaboration for complex queries, docker integration
- **Rantr - Social Media App** [HTML/CSS, JAVA, Google Firebase database] 2023
 - Built full-stack Instagram-style app to support 100+ concurrent users with user persistence & authentication

Interests

- Basketball, Gym, Reading, Hiking, Volunteering(Sunday School, Food bank), Guitar

Education

B.Sc. Computer Science, West Virginia University

2020-2024
